

For your first assignment, you will use your newfound knowledge of HTML and CSS to create a simple webpage about yourself. It should include the following:

- Fixed-width centered layout
- Heading 1
- Heading 2
- Paragraph
- Bold or italics
- Horizontal rule
- Ordered or unordered list
- Link to website
- Link to email address
- Image

Grading

This assignment is worth 10 points – 1 point each for each item above that is included and styled.

Considerations

In order to earn credit for each item, you will need to include each one in your HTML and your CSS. As you style each element, consider font size, line height, font color, etc. You will also want to use margin and padding to provide adequate spacing between elements.
