

For this assignment, you will create a webpage with basic information about an animal of your choice. Your page will have an image-based design and should include the following:

- Fixed-width centered layout
- Background image
- Header image
- Image in content
- Correct formatting of HTML and CSS

Grading

This assignment is worth 10 points – 2 points each for the items listed above that are included and styled (if necessary).

Considerations

For this assignment, we will use Photoshop to do some very basic image editing. In addition to getting help in class, you may want to look into some video tutorials (on YouTube or *lynda.com*) if you are unfamiliar with how it works.

Schedule
