

Using the provided files and examples (see the Day 5 post on our website), create four layouts that match the given specifications.

Grading

This assignment is worth 10 points – 2 points for each layout section requiring columns.

Considerations

It might be useful to do some of the calculations for this assignment on paper – a printout of the various layouts is being provided on our website. For mathematical purposes, assume each column takes either 1/3 or 2/3 of the provided space. Don't forget to account for padding.

You will use the IDs and classes in the provided stylesheet to create your layouts. Make sure to change the body ID attribute for each layout so that you can target individual pages.

Schedule

Day 5 – Tue 9/9

Wireframing

Practice Layouts Intro

Day 6 – Thu 9/11

Image-Based Design Due

Practice Layouts Work Day

Day 7 – Tue 9/16
