

Create a polished responsive website on a subject of your choice. Remember that a responsive website should include a flexible layout and media queries that adjust your design as necessary. For the purposes of this assignment, your site's design should be optimized for all screen sizes.

Your website should also include two advanced components. This could be a JavaScript mobile menu, an audio or video element, information for search engine optimization, a tracking code for analytics, or some type of embeddable content. The components you choose should make sense given the content of your site and should be styled as necessary to fit your design.

Requirements

- Two advanced components
- Flexible layout
- Designed for all screen sizes
- All sources cited
- Present for critique (8 points)

Grading
